

Pedernales Electric Cooperative, Inc.
 P.O. Box 1 · Johnson City, Texas 78636

December 3, 2020

Dear Member:

As your neighbors in our PEC communities, we are dedicated to preserving the life and beauty of the Texas Hill Country. As part of our continuing commitment to the reliability of our electric system, we will be performing vegetation maintenance on overhead distribution lines in your area. PEC understands maintaining the aesthetic and health of your landscaping is important, so we ask that you partner with us to improve safety around this equipment.

We have entrusted Pannell Co. to remove safety hazards and obstacles that could cause a power outage or slow down power restoration. Visit pec.coop/trees for additional information about our tree care program, landscaping tips, and National Electrical Safety Code and ANSI A300 standards.

For your safety:

- Never prune trees near electrical equipment yourself. Electricity can jump from the lines to your body, your tools, or nearby branches, causing injury or even death
- It may be necessary to access your property by vehicle or on foot. Don't hesitate to ask for identification if you are concerned about anyone at your location
- If you have a locked gate or special instructions, contact us using the information below
- This is a maintenance project on PEC's equipment and you are not required to be at the location

Tree Pruning: What to Expect

In order to ensure reliable electric service, our crews may prune trees away from lines.
